AI LOAN ELIGIBILITY CHECKER

Project Overview

The **AI Loan Eligibility Checker** is an AI-powered BFSI (Banking, Financial Services, and Insurance) web platform designed to simplify personal financial decision-making. The platform offers a suite of interactive financial tools, including a **Loan Eligibility Checker**, **Credit Score Analyzer**, **EMI Calculator**, and **AI Financial Tips**.

Built using modern web standards—HTML, CSS, and JavaScript—the application features a sleek dark glassmorphism user interface. Under the hood, it leverages Claude AI for generating intelligent, tailored financial advice and Google Sheets for structured data management and tracking.

Project Stats & Mentor

Project Breakdown:

- **Total Epics:** 8
- **Total Tasks:** 16
- **Total Subtasks:** 0

Mentorship:

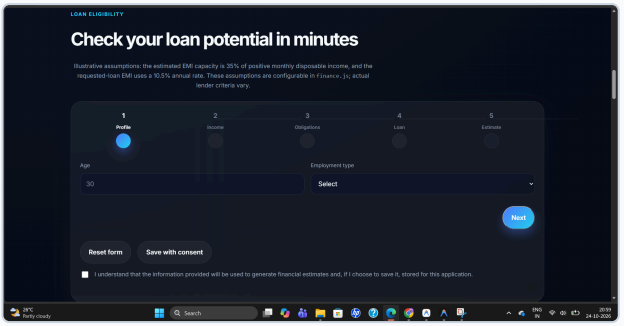

- **Mentor:** Sai Prathyusha Nagilla
- **Contact:** prathyusha+mentor@thesmartbridge.com

1. Scenarios

The platform is designed around intuitive user journeys that simplify complex financial planning tasks into actionable steps.

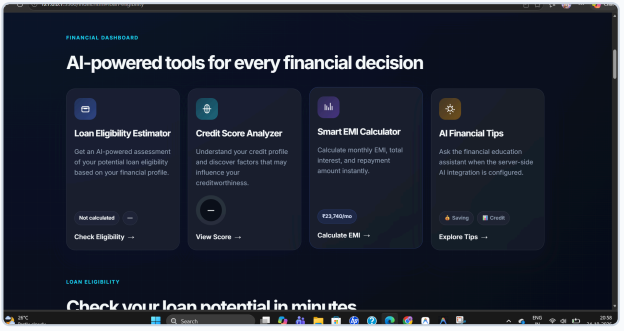

Scenario 1: Checking Loan Eligibility

The user inputs their monthly income, existing monthly obligations, desired loan amount, and tenure into the Loan Eligibility Checker tool. The tool evaluates the inputs using pre-defined financial rules and AI analysis to determine the eligible loan amount, approval probability, and personalized tips for improving eligibility.

Scenario 2: Navigating the Dashboard & Financial Tools

Upon visiting the platform, the user is presented with a centralized dashboard showcasing all four primary tools: Loan Eligibility Checker, Credit Score Analyzer, EMI Calculator, and AI Financial Tips. Quick links and summary metrics allow easy navigation across tools.

Scenario 3: Repayment Planning with EMI Calculator

The user enters the principal loan amount, annual interest rate, and repayment tenure. The EMI Calculator immediately calculates the monthly EMI, total interest payable, and total payment amount, presenting a clear breakdown to help the user plan their monthly budget.

2. Technical Architecture

The application is built using a modern full-stack web architecture. The key technologies utilized include:

- **Backend / Scripting:** Python
- **Frontend:** HTML5, CSS3 (Dark Glassmorphism design), JavaScript (ES6+)
- **Version Control:** Git & GitHub
- **AI & Data Integration:** Claude AI API, Google Sheets API

3. System Requirements

Hardware Requirements:

- **Processor:** Intel Core i5 / AMD Ryzen 5 or equivalent
- **Memory (RAM):** 8 GB required (16 GB recommended)
- **Storage:** 256 GB / 512 GB SSD
- **Network:** Min. 10 Mbps stable connection

Software Requirements:

- **OS:** Windows 10/11, macOS, or Linux (Ubuntu 20.04+)
- **Browser:** Modern web browser (Chrome, Firefox, Edge, Safari)

4. Website Pages / Modules

- **Loan Eligibility Checker:** Evaluates financial profile metrics to estimate maximum loan eligibility and approval chance.
- **Credit Score Analyzer:** Assesses key factors influencing credit score and provides actionable feedback to improve ratings.
- **EMI Calculator:** Calculates monthly installments, interest breakdowns, and repayment schedules instantly.
- **AI Financial Tips:** Delivers tailored financial advice powered by Claude AI to guide intelligent decision-making.

5. Conclusion

The AI Loan Eligibility Checker empowers users with seamless, intelligent financial tools that turn complex decisions into straightforward insights. By unifying AI-driven advice with real-time calculators, the platform significantly enhances personal financial planning and decision confidence in the BFSI space.
